Partnership Agreement
2014 - 2020

Introduction

A multidisciplinary infrastructure useful to research and development projects related with the management and utilization of solid waste and wastewater, is under development within the facilities of the Hellenic Mediterranean University's (HMU) Farm...named **ALL4WASTE**. The All4Waste facility will be operated by the **Hellenic Mediterranean University Property and Management Company**.

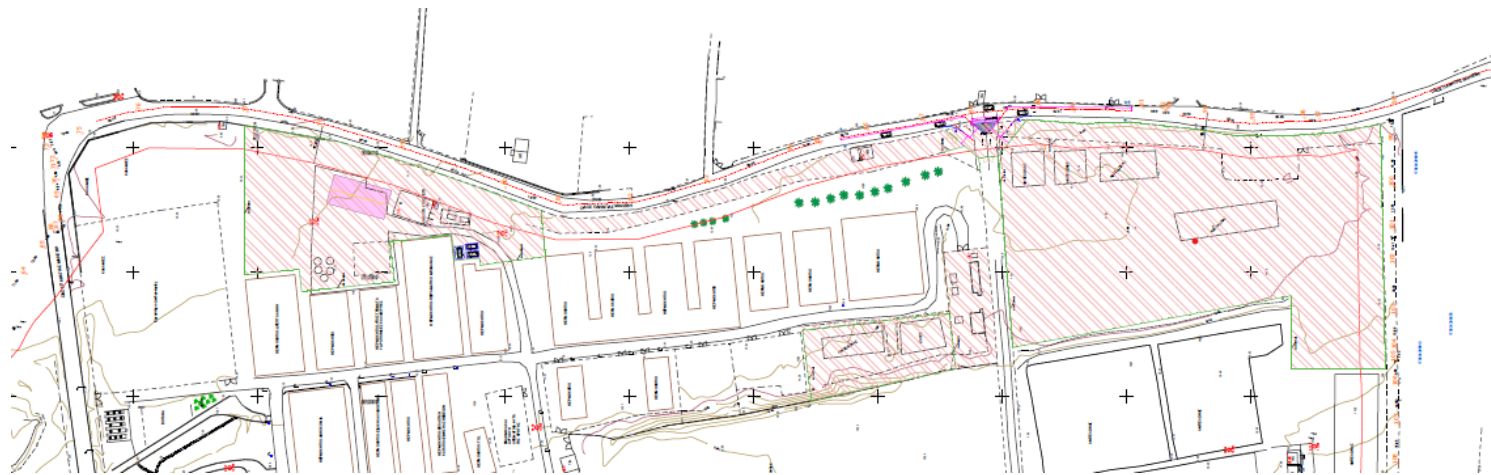

All4Waste facilities

The main aim of ALL4WASTE

.....is to allow mainly (but not exclusively) private entities to implement their research and innovative activities related to municipal solid waste, agro-industrial waste and wastewater management, utilization and treatment in the framework of the Circular Economy.

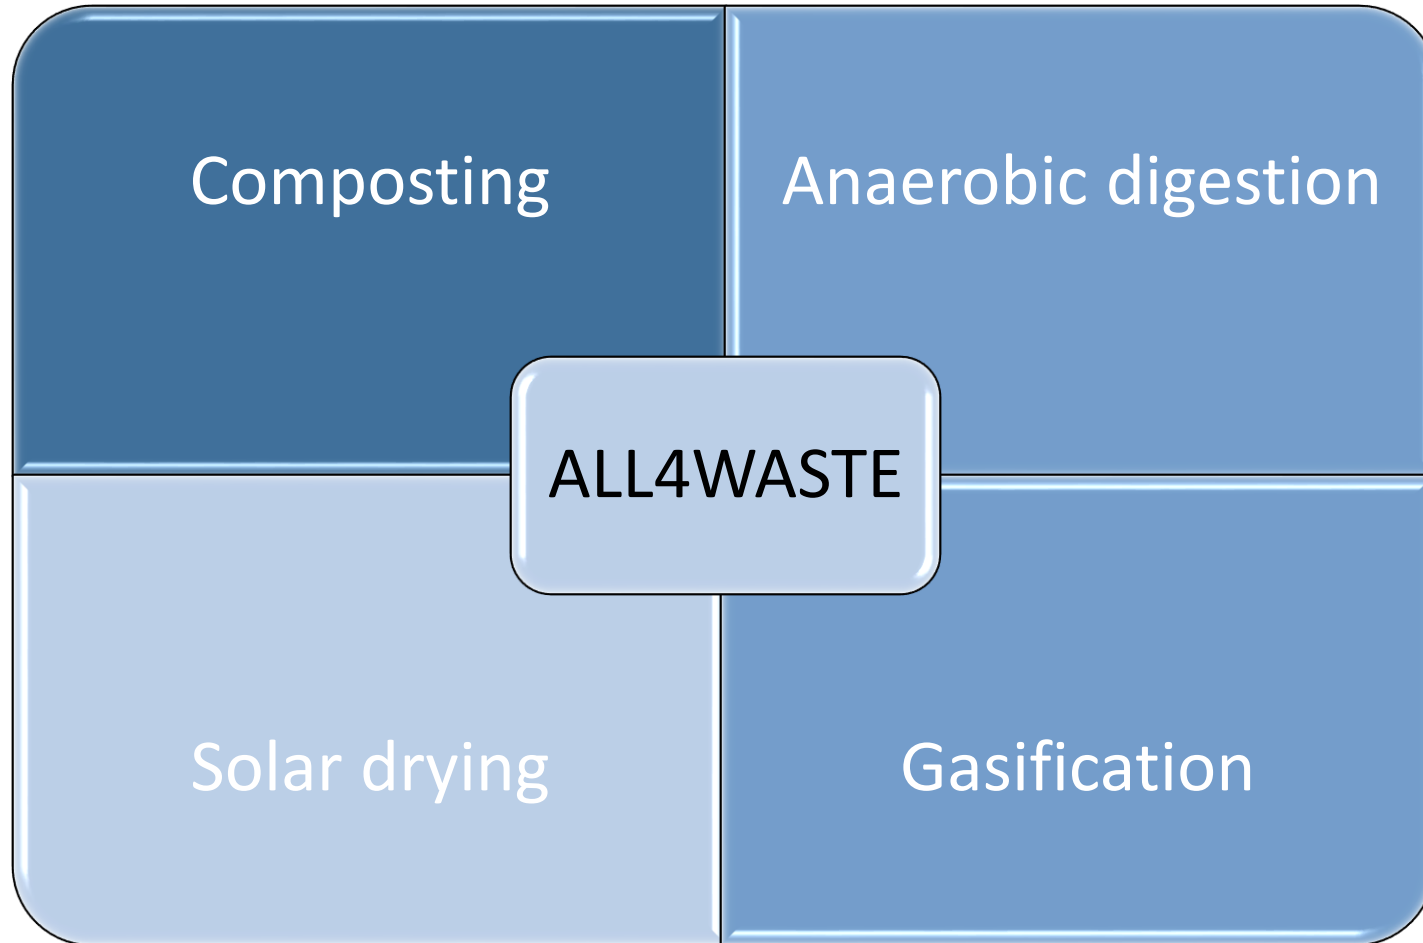

Topographic diagram of ALL4WASTE

A research & innovation park methodology

The users will have access to various treatment units of different dimensions and capacities such as experimental, bench size, pilot and demonstration, for all main processing technologies and to analytical equipment of high precision

Main processing technologies of All4Waste...

Results

The interaction and coexistence under the same roof of SME's and Universities, is the only real way to develop synergies (including B2B services) and of course accelerate transition from research to innovation and to the market.

Acknowledgements

This research is co-funded within the Partnership Agreement for the Development Framework 2014-2020 by European Union and Greek national funds, through the Operational Program Competitiveness, Entrepreneurship, and Innovation (project No. code ΓΓ1CL-0058445).
